

MUHAMMAD TALLAL AAMIR

SENIOR FULL STACK DEVELOPER | REACT, NEXT.JS, NODE.JS & CLOUD APPLICATIONS

Islamabad, Pakistan | +92 312 5126884 | tallalaamir321@gmail.com | Open to Remote International Roles

Modern Frontend Engineering

Scalable Backend & APIs

End-to-End Product Delivery

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 3+ years of experience building responsive web applications, real-time collaboration platforms, business portals, e-commerce systems, and mobile-integrated solutions. Strong across React, Next.js, Node.js, Express, REST APIs, WebSockets, SQL and NoSQL databases, authentication, cloud services, and production deployment. Progressed from developer to Team Lead and Development Lead by taking ownership of architecture, client communication, debugging, code quality, and end-to-end delivery. Brings additional strength in Shopify engineering, giving a practical understanding of high-conversion commerce systems and third-party integrations.

FULL-STACK EXPERTISE

- Frontend architecture with React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, Material UI, responsive interfaces, and reusable component systems
- Backend development with Node.js, Express.js, REST APIs, WebSockets, authentication, role-based access, background workflows, and third-party integrations
- Data and cloud experience with PostgreSQL, MongoDB, MySQL, SQL Server, Supabase, Firebase, AWS services, GitHub, Netlify, and VPS deployment
- Real-time applications, dashboards, admin panels, workflow automation, product platforms, e-commerce systems, performance optimization, testing, and production debugging

PROFESSIONAL EXPERIENCE

Freelance Full Stack Developer | Fiverr & Direct Clients | Jun 2023 - Present

- Deliver custom web applications, business portals, dashboards, landing pages, e-commerce features, and performance improvements for international clients.
- Handle complete project delivery from requirements and technical planning through frontend, backend, database, integration, testing, deployment, and post-launch support.
- Build with React, Next.js, Node.js, Express, Supabase, Firebase, MongoDB, PostgreSQL, JavaScript, TypeScript, Tailwind CSS, and Shopify where commerce functionality is required.
- Communicate directly with clients, estimate tasks, explain technical trade-offs, troubleshoot production issues, and ship maintainable code under practical deadlines.

Development Lead | Full Stack & E-commerce Solutions | Noor Ahmed E-Commerce Solutions | Apr 2025 - Jan 2026

- Joined as a developer and progressed to Team Lead and Development Lead through strong delivery, debugging ability, project ownership, and mentoring.
- Led web application and e-commerce projects involving reusable frontend systems, API integrations, real-time features, advanced business logic, dynamic interfaces, and database-driven workflows.
- Owned client discussions, requirement gathering, task breakdown, architecture decisions, code reviews, team mentoring, delivery standards, and coordination across in-house and offshore projects.
- Improved maintainability and performance by reducing redundant code, designing reusable components, standardizing development practices, and reviewing production-critical changes.

Full Stack Developer - Offshore Project | Techtrove LLC | May 2025 - Jan 2026

- Built a Trello-style collaboration platform using Next.js, Node.js, MongoDB, WebSockets, and scalable state management.
- Implemented boards, lists, cards, drag-and-drop workflows, cross-board movement, REST APIs, real-time multi-user updates, direct messaging, group communication, and backend data flows.
- Worked across frontend architecture, API design, database modeling, authentication, performance, debugging, and deployment-oriented development.

Shopify & Frontend Developer - Offshore Project | Sytrix | May 2025 - Jan 2026

- Built custom storefront experiences and advanced product interfaces for international brands, including jewelry product customizers with engraving, materials, sizing, add-ons, previews, and complex variant logic.
- Developed dynamic frontend components, metafield-powered layouts, API-connected workflows, responsive interfaces, and production fixes using JavaScript, Liquid, HTML, and CSS.

Web & App Developer | Global Experts | Dec 2023 - Oct 2024

- Contributed to web and mobile application development using HTML, CSS, JavaScript, Flutter, MERN-stack concepts, databases, and application integration workflows.

Shopify Developer | Sunskill Technologies | Dec 2024 - Mar 2025

- Developed custom themes, application integrations, frontend functionality, and performance improvements aligned with client business requirements.
- Integrated third-party services and APIs, debugged production issues, and improved product discovery, cart interactions, and responsive user experience.

Training Officer - Advanced Python & Software Development | Roshan Hunar Markaz, Gujar Khan (NAVTTTC Project) | Feb 2026 - Present

- Deliver Advanced Python and software development training under NAVTTTC skills development initiatives, strengthening mentoring, communication, and technical explanation skills.
- Design practical labs, assessments, and project-based exercises covering programming logic, software development, and applied problem solving.

SELECTED FULL-STACK PROJECTS

Car Zone Portal - Vehicle Auction Platform - Built a production-ready auction platform with user registration, vehicle inventory, per-car bidding access, live bidding workflows, admin dashboards, winner selection, role-based access, and database-backed operations. Live project: <https://car-zone-portal.vercel.app/>

Tech/Tools: Next.js, React, Node.js, Supabase, PostgreSQL, Authentication

Trello Clone - Real-Time Work Management App - Developed a real-time collaboration platform with boards, lists, cards, drag-and-drop workflows, cross-board movement, direct and group communication, multi-user updates, backend APIs, and scalable state management.

Tech/Tools: Next.js, Node.js, MongoDB, Socket.IO, WebSockets, Zustand

Inventory Management System - Built a structured inventory application covering item check-in/check-out, inventory levels, thresholds, organizations, locations, categories, validation rules, duplicate prevention, and administrative workflows.

Tech/Tools: Angular, .NET Web API, Dapper, SQL Server, Azure SQL

Business Websites & Service Platforms - Delivered responsive, conversion-focused websites and service portals for businesses including estimation, dispatch, real estate, healthcare, LED display, and professional-services companies.

Tech/Tools: Next.js, React, Tailwind CSS, Node.js, MongoDB, Netlify, VPS

Advanced Commerce & Product Systems - Created configurable product experiences, booking and rental workflows, dynamic collection filters, AJAX carts, upsell integrations, custom checkout-related logic, and reusable storefront components.

Tech/Tools: JavaScript, APIs, Shopify Liquid, Metaobjects, Metafields, AJAX

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, jQuery, AJAX, Responsive Design

Backend & APIs: Node.js, Express.js, C#, .NET Web API, REST APIs, WebSockets, Socket.IO, Authentication, Role-Based Access, Third-Party APIs

Databases: PostgreSQL, MongoDB, SQL Server, MySQL, Firebase, Supabase, Azure SQL, Dapper

Cloud & Tools: AWS S3, CloudFront, Firebase Functions, MongoDB Atlas, Git, GitHub, Postman, Netlify, Hostinger VPS, Shopify CLI

Mobile & Additional: React Native, Flutter, Python, Java, SQL, Redux, Context API, Zustand, Recoil

Commerce: Shopify Liquid, Online Store 2.0, Metafields, Metaobjects, Shopify APIs, Custom Themes, App Integrations, AJAX Cart

EDUCATION

Bachelor of Science (BS) in Bioinformatics - COMSATS University Islamabad
