

MUHAMMAD TALLAL AAMIR

SENIOR FULL-STACK SOFTWARE ENGINEER | REACT, NEXT.JS, NODE.JS & .NET

Islamabad, Pakistan | +92 312 5126884 | tallalaamir321@gmail.com | Portfolio: tallal-aamir-portfolio-website.netlify.app

Product Engineering

APIs & Real-Time Systems

Databases, Cloud & Delivery

WHAT I BRING TO THE TABLE

4+ years of software and web development experience building production applications across frontend, backend, APIs, databases, real-time systems, integrations, and deployment. I bring end-to-end ownership: turning unclear requirements into practical architecture, shipping clean production code, debugging difficult issues, communicating technical trade-offs, and mentoring developers. My strongest stack is React, Next.js, Node.js, and TypeScript, with hands-on experience in .NET Web API, C#, Angular, SQL/NoSQL databases, authentication, WebSockets, and cloud-backed application delivery.

CORE ENGINEERING STRENGTHS

- Frontend engineering with React, Next.js, Angular, TypeScript, JavaScript, Tailwind CSS, Material UI, responsive interfaces, reusable component systems, and state management.
- Backend development with Node.js, Express.js, C#, .NET Web API, REST APIs, WebSockets/Socket.IO, authentication, role-based access, validation, and third-party integrations.
- Data systems using PostgreSQL, MongoDB, SQL Server, MySQL, Supabase, Firebase, Azure SQL, and Dapper, with practical experience designing business workflows and database-backed applications.
- Production ownership across architecture, debugging, performance improvement, code review, deployment, client/stakeholder communication, team mentoring, and technical delivery.

SELECTED ENGINEERING WORK

Car Zone Portal - Vehicle Auction Platform - Built a production-ready platform with user registration, vehicle inventory, per-car bidding access, live bidding workflows, admin dashboards, winner selection, authentication, and role-based access. Live: car-zone-portal.vercel.app/

Tech: Next.js, React, Node.js, Supabase, PostgreSQL, Authentication

Trello-Style Real-Time Collaboration Platform - Built boards, lists, cards, drag-and-drop, cross-board movement, REST APIs, real-time multi-user updates, messaging, and scalable state management.

Tech: Next.js, Node.js, MongoDB, Socket.IO, WebSockets, Zustand

Inventory Management System - Built item check-in/check-out, inventory levels, thresholds, organizations, locations, categories, validation, duplicate prevention, and administrative workflows.

Tech: Angular 18, .NET Web API, Dapper, SQL Server, Azure SQL

Vehicle Tracking System - Contributed to a web and mobile tracking solution, working across UI implementation, application integration, testing, troubleshooting, and shared data workflows between web and Flutter clients.

Tech: JavaScript, Flutter, Web/Mobile Integration, APIs, Databases

School Management System - Built a practical Python-based school management system used in day-to-day operations for student records and administrative workflows, with direct ownership of implementation, testing, and maintenance.

Tech: Python, SQL, Application Logic, Data Management

PROFESSIONAL EXPERIENCE

Independent Senior Full-Stack Developer | Contract & Direct Client Work | Jun 2023 - Present

- Own delivery of custom web applications, business portals, dashboards, e-commerce systems, APIs, and performance improvements for international clients.
- Work end to end across requirements, technical planning, frontend, backend, databases, integrations, testing, deployment, and post-launch support.
- Build with React, Next.js, Node.js, Express, Supabase, Firebase, MongoDB, PostgreSQL, JavaScript, TypeScript, Tailwind CSS, and commerce technologies when required.
- Communicate directly with clients, estimate work, explain technical trade-offs, troubleshoot production issues, and deliver maintainable code under practical deadlines.

Development Lead | Noor Ahmed E-Commerce Solutions | Apr 2025 - Jan 2026

- Progressed from developer to Team Lead and Development Lead through delivery quality, debugging ability, ownership, and mentoring.
- Led web application and e-commerce work involving reusable frontend systems, APIs, real-time features, advanced business logic, and database-driven workflows.
- Owned requirements, task breakdown, architecture decisions, code reviews, team mentoring, delivery standards, and coordination across in-house and offshore projects.
- Improved maintainability and performance by reducing redundant code, standardizing reusable components, and reviewing production-critical changes.

Full-Stack Developer - Offshore Project | Techtrove LLC | May 2025 - Jan 2026

- Built a Trello-style collaboration platform with Next.js, Node.js, MongoDB, WebSockets, REST APIs, drag-and-drop workflows, and multi-user real-time updates.
- Worked across frontend architecture, API design, database modeling, authentication, state management, debugging, performance, and deployment-oriented development.

Web & App Developer | Global Experts | Dec 2023 - Oct 2024

- Contributed to web and mobile application development using JavaScript, Flutter, MERN-stack concepts, databases, and application integration workflows.
- Worked on a Vehicle Tracking System and company website across development, testing, troubleshooting, and mobile/web integration.

ADDITIONAL PROFESSIONAL EXPERIENCE

Shopify & Frontend Developer - Offshore Project | Sytrix | May 2025 - Jan 2026

- Built advanced product interfaces and dynamic frontend systems for international brands, including configurable product experiences with complex variant logic.
- Developed API-connected workflows, responsive interfaces, custom JavaScript/Liquid components, and production fixes.

Shopify Developer | Sunskill Technologies | Dec 2024 - Mar 2025

- Developed custom themes, integrations, frontend functionality, and performance improvements aligned with business requirements.
- Integrated third-party services and APIs and debugged production issues across product discovery, cart interactions, and responsive UX.

Training Officer - Advanced Python & Software Development | Roshan Hunar Markaz, Gujar Khan (NAVTTTC Project) | Feb 2026 - Present

- Deliver Advanced Python and software development training, practical labs, assessments, and project-based exercises while mentoring learners in applied problem solving.

ADDITIONAL PROJECT DEPTH

Business Websites & Service Platforms - Delivered responsive, conversion-focused websites and service portals across estimation, dispatch, real estate, healthcare, LED display, and professional-services use cases.

Tech: Next.js, React, Tailwind CSS, Node.js, MongoDB, Netlify, VPS

Advanced Commerce & Product Systems - Built configurable product experiences, booking/rental workflows, dynamic filters, AJAX carts, upsell integrations, custom checkout-related logic, and reusable storefront components.

Tech: JavaScript, APIs, Shopify Liquid, Metaobjects, Metafields, AJAX

ENGINEERING PRACTICES

- Translate business requirements into technical plans, API boundaries, data models, and reusable implementation patterns before coding.
- Use Git-based workflows, code review, validation, defensive error handling, and environment separation to keep production changes maintainable and safer to deploy.
- Comfortable leading technical discussions, mentoring developers, documenting decisions, and explaining trade-offs to both technical and non-technical stakeholders.

TECHNICAL SKILLS

Frontend: JavaScript, TypeScript, React.js, Next.js, Angular, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, jQuery, AJAX, Responsive Design

Backend & APIs: Node.js, Express.js, C#, .NET Web API, REST APIs, WebSockets, Socket.IO, Authentication, Role-Based Access, Third-Party APIs

Databases: PostgreSQL, MongoDB, SQL Server, MySQL, Firebase, Supabase, Azure SQL, Dapper

Cloud & Tools: AWS S3, CloudFront, Firebase Functions, MongoDB Atlas, Git, GitHub, Postman, Netlify, Hostinger VPS, Shopify CLI

Mobile & Additional: React Native, Flutter, Python, Java, SQL, Redux Toolkit, Context API, Zustand, Recoil

Commerce: Shopify Liquid, Online Store 2.0, Metafields, Metaobjects, Shopify APIs, Custom Themes, App Integrations, AJAX Cart

EDUCATION

Bachelor of Science (BS) in Bioinformatics - COMSATS University Islamabad
