

MUHAMMAD TALLAL AAMIR

SENIOR SHOPIFY DEVELOPER | SHOPIFY TECHNICAL LEAD | LIQUID & E-COMMERCE ENGINEER

Islamabad, Pakistan | +92 312 5126884 | tallalaamir321@gmail.com | Portfolio: tallal-aamir-portfolio-website.netlify.app

Shopify Plus & Online Store 2.0

Custom Liquid / JavaScript

Technical Leadership & Delivery

WHAT I BRING TO THE TABLE

4+ years of hands-on Shopify and web development experience focused on solving the work that sits beyond basic theme edits. I bring advanced Liquid and JavaScript development, reusable Online Store 2.0 architecture, metafield/metaobject-driven experiences, AJAX carts and bundles, product configurators, app/API integrations, performance tuning, and technical leadership. I am comfortable owning delivery from client discovery and architecture through implementation, QA, launch, and post-launch support - with clean, maintainable code that teams can keep using after handoff.

SHOPIFY STRENGTHS

- Custom Shopify and Shopify Plus theme development using Liquid, JSON templates, sections/blocks, Dawn, Symmetry, Spark, and custom/legacy themes.
- Advanced commerce functionality: metafields, metaobjects, product customizers, variant logic, dynamic product pages, collection filtering, predictive/search-driven experiences, AJAX cart, bundles, upsells, booking and rental flows.
- App and API integration, payment/checkout troubleshooting, subscriptions, tracking, third-party services, and production debugging across interconnected storefront systems.
- Responsive UI, CRO-focused implementation, Core Web Vitals, code review, client communication, mentoring, and independent ownership of production-critical work.

PROFESSIONAL EXPERIENCE

Independent Senior Shopify Developer | Contract & Direct Client Work | Jun 2023 - Present

- Own Shopify delivery for international clients, from requirements and technical planning through build, testing, launch, troubleshooting, and post-launch support.
- Build custom sections, product and collection experiences, cart improvements, bundles, filters, landing pages, and responsive storefront features using Liquid, JavaScript, CSS, metafields, and app workflows.
- Resolve difficult production issues involving theme/app conflicts, booking and subscription flows, payment gateways, tracking, product logic, and performance.
- Work directly with store owners and agencies to estimate work, explain trade-offs, and ship maintainable solutions under practical deadlines.

Development Lead | Noor Ahmed E-Commerce Solutions | Apr 2025 - Jan 2026

- Progressed from Shopify Custom Developer to Team Lead and Development Lead through technical delivery, debugging ability, project ownership, and mentoring.
- Led custom-theme and Online Store 2.0 work involving advanced Liquid logic, dynamic filters, AJAX components, metafield-driven layouts, and reusable storefront systems.
- Owned client discussions, requirement breakdown, scope analysis, architecture decisions, code reviews, mentoring, and delivery quality across in-house and offshore work.
- Improved maintainability and performance by reducing redundant Liquid/JavaScript and building configurable components non-technical teams could manage.

Shopify Developer - Offshore Project | Sytrix | May 2025 - Jan 2026

- Built advanced Shopify experiences for international brands, including jewelry product customizers with engraving, materials, sizing, add-ons, previews, and complex variant logic.
- Delivered custom Liquid sections, metafield-powered layouts, responsive interactions, debugging, and ongoing production enhancements.

Shopify Developer | Sunskill Technologies | Dec 2024 - Mar 2025

- Developed custom themes, app integrations, frontend features, and performance improvements aligned with client business and conversion goals.
- Integrated third-party services and APIs and improved responsive browsing, product discovery, cart, and checkout-adjacent experiences.

SELECTED SHOPIFY & E-COMMERCE WORK

Advanced Jewelry Product Customizer - Built configurable product flows covering engraving, materials, sizing, add-ons, variant logic, live previews, and dynamic product-page behavior.

Tech: Shopify Liquid, JavaScript, Metafields, Product Templates, Variant Logic

Dressed For Dinner - Rental Store - Customized booking/calendar behavior, rental workflows, product and collection presentation, FAQs, and responsive UX for a dress-rental brand.

Tech: Shopify Theme Development, Liquid, JavaScript, Booking Workflow

Cart, Bundle & Upsell Systems - Built and debugged AJAX cart behavior, cart drawers, multi-product bundle flows, discount logic, upsells, quantity synchronization, and theme-app integration workflows.

Tech: JavaScript, AJAX, Liquid, Shopify Apps, Cart Logic

Reusable Online Store 2.0 Components - Developed configurable sections and conversion-focused components including product tabs, collection carousels, mega menus, banners, FAQ blocks, landing-page modules, and dynamic content systems.

Tech: Liquid, JSON Templates, CSS, JavaScript, OS 2.0

Collection Filtering & Product Discovery - Built custom filtering and product-discovery experiences using tags, variants, dynamic data, and responsive UI patterns while preserving theme performance and maintainability.

Tech: Liquid, JavaScript, AJAX, Metafields, Collection Logic

Performance & Production Debugging - Diagnosed theme/app conflicts, cart issues, currency/payment edge cases, JavaScript regressions, and slow storefront behavior; simplified code paths and shipped targeted fixes without disrupting live stores.

Tech: Liquid, JavaScript, Shopify Apps, Core Web Vitals, Debugging

ADDITIONAL ENGINEERING DEPTH

Full Stack Developer - Offshore Project | Techtrove LLC | May 2025 - Jan 2026

- Built a Trello-style collaboration platform using Next.js, Node.js, MongoDB, WebSockets, REST APIs, drag-and-drop workflows, and scalable state management.
- Worked across frontend architecture, backend data flows, real-time updates, authentication, debugging, and deployment-oriented development.

Web & App Developer | Global Experts | Dec 2023 - Oct 2024

- Contributed to web and mobile development using JavaScript, Flutter, MERN-stack concepts, databases, and integration workflows, including a Vehicle Tracking System.

Training Officer - Advanced Python & Software Development | Roshan Hunar Markaz, Gujar Khan (NAV TTC Project) | Feb 2026 - Present

- Deliver Advanced Python and software development training, practical labs, assessments, and project-based exercises while mentoring learners in applied problem solving.

FULL-STACK PROJECTS SUPPORTING COMMERCE WORK

Car Zone Portal - Vehicle Auction Platform - Built user registration, vehicle inventory, bidding workflows, admin dashboards, winner selection, authentication, and role-based access. Live: car-zone-portal.vercel.app/

Tech: Next.js, React, Node.js, Supabase, PostgreSQL, Authentication

Trello Clone - Real-Time Work Management - Built boards, lists, cards, drag-and-drop, cross-board movement, multi-user updates, REST APIs, messaging, and scalable state management.

Tech: Next.js, Node.js, MongoDB, Socket.IO, Zustand

TECHNICAL SKILLS

Shopify: Shopify Plus, Liquid, Online Store 2.0, JSON Templates, Sections/Blocks, Metafields, Metaobjects, Shopify CLI, Theme Kit, Shopify APIs, App Integrations

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design

Backend / Integrations: Node.js, Express.js, REST APIs, WebSockets, Authentication, Third-Party APIs

Data / Cloud / Tools: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, AWS S3, CloudFront, Git, GitHub, Netlify, VPS Deployment

Additional: React Native, Flutter, Python, C#, SQL

EDUCATION

Bachelor of Science (BS) in Bioinformatics - COMSATS University Islamabad
