

MUHAMMAD TALLAL AAMIR

SHOPIFY DEVELOPER | LIQUID, OS 2.0, THEME DEVELOPMENT & PERFORMANCE

Islamabad, Pakistan | +92 312 5126884 | tallalaamir321@gmail.com | Portfolio: tallal-aamir-portfolio-website.netlify.app

Shopify Liquid & Online Store 2.0

Dawn / Custom Themes / Shopify CLI

Performance & App Integrations

PROFILE

Shopify developer with 4+ years of hands-on experience building, customizing, and optimizing production storefronts for international clients. Strong in Liquid, Online Store 2.0, Dawn and custom themes, Shopify CLI/Theme Kit, reusable sections, JavaScript/CSS, app integrations, and performance optimization. I work comfortably from Figma, reference sites, or business requirements and can own delivery from implementation and debugging through QA, launch, and post-launch support.

SHOPIFY DELIVERY STRENGTHS

- Custom theme development and theme upgrades using Liquid, JSON templates, sections/blocks, Dawn, Symmetry, Spark, and custom or legacy themes.
- Figma/reference-to-Shopify implementation, reusable landing-page sections, PDP and collection UX, navigation/search, product discovery, and responsive storefront refinement.
- Shopify CLI and Theme Kit workflows, metafields/metaobjects, variant logic, AJAX carts, bundles, upsells, product customizers, booking/rental flows, and app integrations.
- Performance optimization and Core Web Vitals work: reducing unnecessary Liquid/JavaScript, third-party script impact, image/asset overhead, and production regressions without breaking live-store functionality.

PROFESSIONAL EXPERIENCE

Independent Senior Shopify Developer | Contract & Direct Client Work | Jun 2023 - Present

- Build and customize Shopify storefronts for international clients using Liquid, JavaScript, CSS, Online Store 2.0, metafields, theme apps, and merchant-managed sections.
- Deliver product and collection experiences, landing pages, custom sections, carts, bundles, filters, responsive UI, app integrations, and performance improvements.
- Diagnose production issues involving theme/app conflicts, tracking, payments, booking/subscription flows, variant logic, cart behavior, and slow storefront performance.
- Work directly with store owners and agencies to scope requirements, explain trade-offs, QA across devices, and ship maintainable changes under practical deadlines.

Development Lead | Noor Ahmed E-Commerce Solutions | Apr 2025 - Jan 2026

- Progressed from Shopify Custom Developer to Team Lead and Development Lead through hands-on delivery, debugging, project ownership, code review, and mentoring.
- Led custom-theme and OS 2.0 work involving advanced Liquid logic, reusable storefront components, dynamic filters, AJAX interactions, metafield-driven layouts, and client-facing implementation.
- Improved maintainability and performance by reducing redundant Liquid/JavaScript and structuring configurable sections that non-technical teams could manage.

Shopify Developer - Offshore Project | Sytrix | May 2025 - Jan 2026

- Built advanced Shopify storefront experiences including jewelry product customizers with engraving, materials, sizing, add-ons, previews, and complex variant logic.
- Delivered custom Liquid sections, metafield-powered layouts, responsive interactions, debugging, and ongoing production enhancements.

Shopify Developer | Sunskill Technologies | Dec 2024 - Mar 2025

- Developed custom themes, app integrations, responsive frontend features, and performance improvements aligned with business and conversion goals.
- Integrated third-party services and APIs and improved browsing, product discovery, cart, and checkout-adjacent experiences.

SELECTED SHOPIFY WORK

Reusable OS 2.0 Components - Developed configurable, conversion-focused sections including landing-page modules, product tabs, collection carousels, mega menus, banners, FAQs, and dynamic content systems.

Tech: Liquid, JSON Templates, CSS, JavaScript, Shopify CLI, OS 2.0

Performance & Production Debugging - Diagnosed theme/app conflicts, slow storefront behavior, JavaScript regressions, cart issues, and third-party overhead; simplified code paths and shipped targeted fixes without disrupting live stores.

Tech: Liquid, JavaScript, Shopify Apps, Core Web Vitals, Debugging

Advanced Jewelry Product Customizer - Built configurable product flows covering engraving, materials, sizing, add-ons, live previews, and complex variant behavior while keeping the storefront manageable.

Tech: Shopify Liquid, JavaScript, Metafields, Product Templates, Variant Logic

Cart, Bundle & Upsell Systems - Built and debugged AJAX carts, cart drawers, multi-product bundles, discount logic, upsells, quantity synchronization, and theme-app integration workflows.

Tech: JavaScript, AJAX, Liquid, Shopify Apps, Cart Logic

Collection Filtering & Product Discovery - Built custom filtering and product-discovery experiences using tags, variants, dynamic data, metafields, and responsive UI patterns.

Tech: Liquid, JavaScript, AJAX, Metafields, Collection Logic

Dressed For Dinner - Rental Store - Customized booking/calendar behavior, rental workflows, product and collection presentation, FAQs, and responsive UX for a dress-rental brand.

Tech: Shopify Theme Development, Liquid, JavaScript, Booking Workflow

TECHNICAL SKILLS

Shopify: Shopify Plus, Liquid, Online Store 2.0, JSON Templates, Sections/Blocks, Metafields, Metaobjects, Shopify CLI, Theme Kit, Shopify APIs, App Integrations

Frontend: JavaScript, TypeScript, React.js, Next.js, HTML5, CSS3, Tailwind CSS, Bootstrap, Material UI, Responsive Design

Performance / QA: Core Web Vitals, theme/app debugging, script and asset optimization, responsive QA, cross-browser testing, production troubleshooting

Backend / Integrations: Node.js, Express.js, REST APIs, WebSockets, Authentication, Third-Party APIs

Data / Cloud / Tools: MongoDB, PostgreSQL, MySQL, Firebase, Supabase, AWS S3, CloudFront, Git, GitHub, Netlify, VPS Deployment

Additional: React Native, Flutter, Python, C#, SQL

ADDITIONAL ENGINEERING EXPERIENCE

Full Stack Developer - Offshore Project | Techtrove LLC | May 2025 - Jan 2026

- Built a Trello-style collaboration platform using Next.js, Node.js, MongoDB, WebSockets, REST APIs, drag-and-drop workflows, authentication, and scalable state management.
- Worked across frontend architecture, backend data flows, real-time updates, debugging, and deployment-oriented development.

Web & App Developer | Global Experts | Dec 2023 - Oct 2024

- Contributed to web and mobile development using JavaScript, Flutter, MERN-stack concepts, databases, and integration workflows, including a Vehicle Tracking System.

Training Officer - Advanced Python & Software Development | Roshan Hunar Markaz, Gujar Khan (NAV TTC Project) |

Feb 2026 - Present

- Deliver Advanced Python and software development training, practical labs, assessments, and project-based exercises while mentoring learners in applied problem solving.

ADDITIONAL PROJECT DEPTH

Car Zone Portal - Vehicle Auction Platform - Built user registration, vehicle inventory, bidding workflows, admin dashboards, winner selection, authentication, and role-based access. Live: car-zone-portal.vercel.app/

Tech: Next.js, React, Node.js, Supabase, PostgreSQL, Authentication

Trello Clone - Real-Time Work Management - Built boards, lists, cards, drag-and-drop, cross-board movement, multi-user updates, REST APIs, messaging, and scalable state management.

Tech: Next.js, Node.js, MongoDB, Socket.IO, Zustand

EDUCATION

Bachelor of Science (BS) in Bioinformatics - COMSATS University Islamabad
